Group Accountability Document

In this space below, please allocate percentages (who did what), and any notes / context you would like to provide regarding your group project. This document is private and <u>will not be shared with anyone</u>. Only Sarah will see it. See Page 2 for some sample submissions.

Please fill out this section:

- Dawson: 13% (All documentation and presentation)
- Anis: 25% (Front end, messages operation and ui)
- Ben: 13% (Project manager and cloud deployment)
- Tristan: 14% (Front end, messages and ui)
- Simon: 20% (Testing and implementing the Messenger API)
- Ethan: 25% (Created messages database table for messenger function, created message schema and model in backend, added api endpoints for messenger functions, created messages.py backend route with create and get message functions, implementation of functions in app.jsx
- Vlad: ?

Notes:
Ethan and Anis were rockstars. Everyone in the group communicated well and contributed to the project except for Vlad who was not very present, and I'm still not sure if/what they did. All other team members had great attitudes and eager to step in and help where needed.

Sample submissions...

Sample #1: Everyone contributed equally

- Karla: 25% (DevOps, Project Management)
- Chuck: 25% (Frontend)
- Martha: 25% (Backend & testing)
- Walter: 25% (Backend & testing)

Notes: everyone showed up to meetings, communicated well with one another, and did their part.

Sample #2: Uneven contributions

- Karla: 40% (DevOps, Project Management, Backend)
- Chuck: 40% (Frontend, Backend)
- Martha: 10% (some Backend)
- Walter: 10% (some Frontend)

Notes: Karla and Chuck did the majority of the work. Martha and Walter were hard to get a hold of / communicate with, and so their contributions were limited.
